

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta, Thursday, Sept. 17th 1942

Mrs. D. Connell was a Hanna visitor last week.

Ladies' Card Club met evening at the home of Mrs. Lyon. Honors were shared by Mrs. Lee and Mrs. Nicholson.

The Club will meet next week with Miss F. Barros.

Blight Strikes Rye Crops

Lethbridge, Aug 1—Government agricultural scientists are studying a blight that has appeared in the winter rye and wheat fields of Southern Alberta. It appeared some weeks ago but is more evident today as the harvest gets well under way.

The heads have not filled. Fields appear to be thrifty but when the heads are examined they are found to be barren of kernels. Some fields are so bad farmers are not even harvesting them. Other fields in the same vicinity are quite normal, in fact, are yielding good returns.

The cause of the unusual condition is being investigated now. Suggestion is winter killing, another is that frost caught the fields in the bloom stage.

It is now **ILLEGAL**
to HOARD scrap steel
or UNUSABLE machinery

The Steel Controller has ordered that, after September 15, 1942, no person may retain in his possession scrap iron or steel weighing a total of 500 pounds or more unless he has a permit.

(For the purposes of the new regulations, scrap metal includes machinery, structural steel, or any other article or commodity containing iron or steel, which is not serving an immediate vital purpose.)

The order also provides:

That anyone, coming into possession after September 15 of scrap iron or steel weighing 500 pounds or more, must dispose of it within 20 days.

That any person having a valid reason for not disposing of scrap metal as scrap metal or who believes that it can serve some essential purpose, must send in a report by September 15 to the Used Goods Administrator of the War-time Prices and Trade Board, Lansdowne Building. This report, if given, must reveal the exact description, quantity, and location of his scrap metal.

The provisions of the order do not apply to scrap dealers who are already subject to previous orders; nor do they affect metal fabricators and processors who are in legal possession of metal to be used in manufacturing.

A copy of the order, S.C. 16, may be obtained from the Steel Controller, Department of Munitions and Supply, Ottawa.

Infractions of the new regulations are subject to a fine of up to \$5,000, or imprisonment of up to five years, or both fine and imprisonment.

Department of Munitions and Supply
HONOURABLE G. D. HOWE, MINISTER

494

Mrs. Dan McLellan returned Tuesday morning from Spokane, Wash., where she had been for nearly three months with a daughter who was ill.

Mrs. W. H. Davis returned Tuesday morning after having spent the week end at Calgary.

Mr. Dug. Smith of Cereal was a town visitor Wednesday.

Private Ray Peterson who is in training in Calgary has a short leave to visit with his parents, Mr. and Mrs. P. S. Peterson.

Mrs. W. Milligan was a Hanna visitor last week.

Lac, Kenneth and Mrs. Ford of Victoria, while on leave, spent a week at the home of the former's father, Mr. A. F. Ford.

Mrs. Brown who has been visiting at the home of her sister, Mrs. Wilson, returned to her home at Turner Valley last Friday.

Mr. and Mrs. Wilson and son, Gordon were Hanna visitors last Friday.

IN THE TRIAL DIVISION OF THE SUPREME COURT OF ALBERTA JUDICIAL DISTRICT OF CALGARY

BETWEEN: S. C. 40204
HOLLAND-CANADA MORTGAGE COMPANY

Defendants

— and —

GEORGE W. BUNNETT and CLEMENTINA BUNNETT, his wife, both formerly of Chinook, in the Province of Alberta and HAROLD BERKS ALLEN, of Heathdale, in the said Province,

Defendants

BEFORE THE HONORABLE

Mr. JUSTICE SHEPHERD Court House, Calgary, Alberta
IN CHAMBERS Monday the 14th day of
September, A. D. 1942

UPON the application of the Plaintiff, upon hearing read the affidavit of Donald P. McLaws, upon hearing Counsel for the applicant:

1. IT IS ORDERED that service upon the defendants George W. Bennett and Clementina Bennett of the statement of Claim in this action by publishing this Order together with the Notice herein endorsed in one issue of the Chinook Advance, be deemed good and sufficient service of the said Statement of Claim.

2. IT IS FURTHER ORDERED that the said defendants do enter a Statement of Defence or Demand of Notice in the office of Clerk of the Supreme Court of Alberta, Judicial District of Calgary, at Calgary, within thirty days of the publication of this Order and Notice.

S. J. Shepherd

J. S. C.

This action is brought to foreclose a mortgage against the North Half of Section Twenty-three [23], Township Twenty-Six [26] Range Eight [8], West of the Fourth Meridian, in the Province of Alberta.

Fourth Year Of War

THE WAR HAS NOW ENTERED its fourth year. In the past twelve months we have had triumphs and reverses, but slowly and surely the offensive is now being taken by the Allied Nations. Since the last anniversary of Hitler's fateful march into Poland, the United States has entered the war on our side, and has taken her place on the fighting fronts, on land and sea and in the air. We have also entered into a full alliance with Russia, that gallant nation which has held the Nazis at bay in spite of overwhelming odds. At the same time, we have acquired a powerful enemy in Japan, who has broken down many of our defenses in the Far East, and whose strength and determination will not be easily overcome. Great Britain in addition, faced with difficulty in India, and it is possible that the next year will see further blows delivered to the Empire in the East.

Position Of Germany At this time we might compare our position with that of Germany. Hitler marked the third anniversary of the outbreak of war with a speech appealing for still further sacrifices by the people to support the war effort. He also appealed for supplies of warm clothing for his armies in Russia, now facing another winter of that long campaign which was scheduled to end many months ago. In addition, Germany is now involved in the initial stages of the Battle of Germany. In the autumn of 1940 the Battle of Britain was fought in the skies over England. Now the Luftwaffe is defending the skies over Germany and occupied Europe. The great bombing raids, now being carried out regularly on German cities, show that we are winning this air battle. With the numbers of planes and men from the Allied nations constantly increasing there is no doubt as to the final outcome.

Canada's Effort Grows Canada commences the fourth year of the war with the imposition of new and heavy income taxes, and with the initiation of Selective Service. Before the end of 1942, the government expects to have added 250,000 persons to the ranks of the armed services and to war industries, and as far as possible, to have every man and woman in Canada, in the place where they can give their greatest contribution to the war effort. With the armed services and industry geared to greater and greater capacity, there is no doubt that Canada is prepared to play her full part in the offensive that will eventually bring about the end of the conflict. At Dieppe the Canadians showed what they can do in battle, and the people at home must prepare to match their courage and endurance until victory is attained.

Scarcity of imported fruit is giving rise to considerable anxiety lest deficiency of vitamin C should result. Fruits are looked upon by a large public as the main source of vitamin C, and mothers who have come to regard orange juice as indispensable for the artificially fed baby and desirable for all children, are often at a loss as to what to substitute. This very popular fruit, especially the citrus fruits, is partly due to popular knowledge of their value as anti-scorbutics in early voyages. It overlooks the fact, none too well known even to those interested in nutrition, that on the whole most vegetables are much richer sources of vitamin C than most fruits. The proverb about "an apple a day" would have been much nearer the truth if it had run "some cabbage each day." People who eat a good many fruits are likely to get enough of the vitamins, and if the vitamin C requirements. Plums, blackberries, grapes, pears, melon and bananas are also poor in vitamin C. Brussels sprouts, cabbage, cauliflower and the salad vegetables, especially mustard and cress and watercress are seven or more times as rich in vitamin C as the group of fruits last mentioned. Since most green vegetables, if they are cooked in the usual way, will preserve the vitamin C can provide more of it, weight for weight, than does orange or lemon juice.

The optimal amount of vitamin C (ascorbic acid) needed by an average adult is 75 mg. daily. As a matter of convenience an estimate has been made showing the number of hours supply of vitamin C yielded on this basis by 4 oz. portions of all the well known fruits and vegetables. Typical examples, arranged in order of merit are as follows:

Number of Hours Supply of Vitamin C Given by 4 Ounce Portions	
Blackcurrants	70
Blackberry Sprouts	35
Mustard Cress - raw	23
Strawberries - raw	25
Broccoli - cooked	24
Cabbage - cooked	20
Cauliflower - cooked	20
Oranges - raw	19
Lemons - raw	15
Gosberries - raw	15
Spinach - cooked	12

It will be observed that potatoes are not included in the table, since the method of presentation does not take account of the fact that they are customarily eaten in quantities much larger than 4 ounces. Twelve ounces of raw potato will supply 10 hours of vitamin C.

Vitamin C, however, is not among the most stable of the vitamins. It begins to be lost as soon as fruits or vegetables are gathered. This loss continues during storage. Part of the vitamin goes into solution in the cooking water and prevention of some of this loss is one of the main advantages of cooking potatoes unpeeled. Quick rise of temperature and fast cooking—by rapid destruction of the enzymes which would otherwise break down the vitamins—preserves them, though the alternative of slow, gradual heating from cold water. All slow cooking methods, including bay-leaf cookery, are detrimental to vegetables. Use during cooking of alkalines like bicarbonate of soda increases the loss of vitamin C.

Canned fruits and vegetables may contain anything from 50% to 100% of the vitamin C present in the raw fruit or vegetable, the amount varying with the fruit or vegetable, and the method of canning.

Cooked green vegetables, rubbed through a sieve, can be given to young children, or raw vegetables such as swedes or carrots can be finely grated or pulped and sieved.

A postal card to the Western Division Health League of Canada, 111 Avenue Road, Toronto, Ontario, will bring you a free vitamin chart for ready reference.

Had A Surprise

American Soldier In London Rode In Queen's Limousine

Private Ora Foster, 22-year-old soldier from Pontiac, Mich., said that "like most soldiers, I did all the talking" when a lady graciously gave him a lift in her limousine.

Finally she asked: "You don't know who I am, do you?"

He replied: "I can't say as I do."

She identified herself as Queen Mary.

"I couldn't think of a thing to say," Foster confessed.

Foster was walking along an English country road one evening when he thumbt a ride in the big car.

GEMS OF THOUGHT

OVERCOMING

Real glory springs from the silent conquest of ourselves; without that the conqueror is only the first slave. —James Thomson.

It is not so much being exempt from faults, as the having overcome them, that is an advantage to us.—Alexander Pope.

You will find it less easy to uproot faults, than to choke them by gaining virtues.—John Ruskin.

If one lives rightly, every effort to put one will only help that one; for God will give the ability to overcome whatever tends to impede progress.—Mary Baker Eddy.

If any speak ill of thee, fly home to thy own conscience and examine thine heart. If they are guilty, it is a just correction; if not guilty, it is a fair instruction.—George Herbert.

Draw the curtain of night upon injuries; shut them up in the tower of oblivion and let them be as though they never had been.—Francis Bacon.

You GIRLS WHO SUFFER DYSMENORRHEA
If you suffer monthly cramps, backache, distress of irregularities, now and then, due to your monthly disturbances, try Lydia E. Pinkham's Vegetable Compound (twice a day, from 100 Made especially for women). This will help build up red blood. Made in Canada.

A FAMOUS BRAND

The Individual Citizen's Army

A Weekly Column About This And That In Our Canadian Army.

By Alan Maurie Irwin

Three weeks ago I devoted this space to the subject of drill. Here comes the same subject again because we have been given an object lesson by our own soldiers at Dieppe in its value.

For the past two years instructors have referred to an incident at Dieppe as an illustration of the value of drill as a discipline builder. It was the evacuation of the beach by the Guards.

Newspaper despatches said: "The Guards brought their rifles with them."

That was all! But it was quite enough. No-one would have criticized them if they had left their equipment behind on that shell-swept beach—nearly everyone did leave his equipment behind and there were no re-enlistments.

But, "the Guards brought their rifles with them." It had long been fashionable for Line Regiments to succeed gently at the Brigade of Guards for their military and endurance to parade ground soldiering. The snarks were good-natured, of course, as well as bickering between regiments, and no-one really believed what he said.

Not after Le Cateau in the last war or after Dunkirk in this!

Now we have a new tradition, a new example of how well-drilled soldiers act in a tight place—the Canadians at Dunkirk.

Here is a quotation of one of the early cables from the Channel front written by Ross Munro of the Canadian Press who went ashore with the Canadians:

"One group of the Westeners was in such good form that even after a five-hour battle they simply sloped arms and marched aboard the boat that picked them up."

The "Tankers" have earned a place in military history too!

Of them another Canadian Press reporter said:

"Crews of the Calgary Tank Regiment, which led the way into Dieppe yesterday, drove the remnants of their battle-worn tank formations through this town tonight"

These two examples of the intelligent discipline that grows out of drill will be quoted by many a drill-sergeant, by many an officer lecturing to recruits in the next few years and will, I hope, be borne in mind by those of us who are apt to criticize without thinking.

Some of you are bound to be asking, just about now, "what's he trying to get at?" Surely he doesn't suggest that the raid on Dieppe was put on just to demonstrate the value of parade ground drill!"

No, I don't suggest that for one moment.

In fact any columnist who tries to say why the Dieppe raid was made would be a fool! There are many reasons why a military high command decides to stage a raid—especially with the war conditions that confront us at present.

And the high command cannot take even the public that pays it into its confidence. We'll have to be kept guessing about it—and so will the enemy.

Men Like This Bran Fruit Pudding

Defense wives who are having trouble getting their menfolk to eat their daily quota of milk and eggs should try this recipe for All-Bran Fruit Pudding. A tempting, satisfying dessert, it contains two eggs, plenty of milk, plus dried fruit, nuts and crisp iron-rich shreds of bran. For a light meal, this is a superb finish, hearty and nourishing. These are the directions:

All-Bran Fruit Bread Pudding
1 cup 1/2-inch bread cubes
1/2 cup All-Bran
1/2 cup chopped nuts
1/2 cup chopped dates or figs
2 eggs
Toast bread cubes and combine with All-Bran, nuts and fruit; turn into a greased baking dish. Beat eggs well; add milk, sugar, salt, vanilla and butter; pour over bread cubes. Place dish in pan of hot water and bake in a moderately hot oven (375 degrees F.) 50 to 60 minutes. Serve warm or cold.

Yield: Six to eight servings (8 x 8 inch dish).

Perhaps its intention was to find out the defense system employed by the enemy.

Perhaps it was to draw attention from some other move.

Perhaps the idea was to find out the morale of the enemy now in France.

Perhaps it was designed to disrupt communications by causing a rush of reinforcements to the place attacked.

Perhaps it was a realistic training scheme in the co-operation of Navy, Army and Air Force.

Perhaps it was for none of those reasons, but, whatever the reason was we members of the Individual Citizen's Army may be sure that "Andy" McNaughton who would rather expend machinery than lives, had the best of all possible reasons and that the lessons learned and the knowledge gained will be used to prosecute the war and hasten the Allied victory.

In the meantime new recruits who join up here as volunteers for service anywhere will start out with squad drill without arms, the manual of arms, musketry and all the other "kindergarten" work that teaches them unity, cohesion and intelligent discipline so that they, too, when their opportunity comes, will be ready to "slope arms and march aboard."

The men who took the beaches at Dieppe and played their part in demolishing the town have found out after weary months and years of waiting what war is like.

That is something we have still to find out.

So far we have only bought a few bonds, liked a few war savings stamps and given to the Red Cross and Buckshee Fund—that sort of thing!

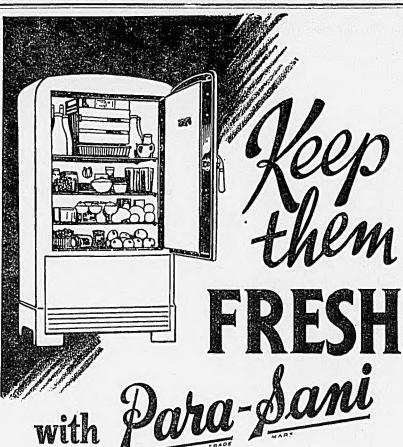

We haven't sacrificed anything. We don't sweat for the war.

Public men rap us on the knuckles if we say that Canada is not doing a full job of war work. They raise a smoke-screen of empty eloquence to beat what is being done. They promise that some day the government will place the whole war effort on a wartime basis, but in the meantime too many of us carry on with our bridge and our golf. We stick nobly to the rations of tea and coffee and sugar and gasoline—and sneak out of all-out service by buying cakes and pastries with sugar in them, by drinking tea and coffee in restaurants and hotels, by using taxi cabs to take us on our useless errands when our own tanks are empty.

We are long on talk and short on discipline. What we need is drill, and lots of it, thrown at us by tough sergeants with a rasp in their voices. Could we march aboard with our rifles at the slope?

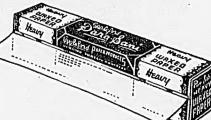

HUGE ICE CAP

Greenland, with the exception of a narrow coastal strip, is covered with a coat of ice 5,000 feet thick. This enormous ice cap is about 1,500 miles long and 630 miles wide.

CHAPTER III.

The German radio propaganda stations were going full blast, trying to capitalize to the full on the rout in France. The booming, cultured voice that came over the air was de-chanted.

"Attention, England! Your English friend in Germany has again to speak to you of the great events that are shaking the world. It is eight months since your government declared war. Since then, France has been at war, despite your English expeditionary force is now trapped in a small area on the French coast, surrounded all sides. There can be no escape from this, foredoomed as you are. Your government not only controls you by the extent of this disaster, but also withholds the truth of the internal situation in England. There have already been secret raids on your coast."

The bairn in the village tavern turned off the radio with a short of disgust. "It's all wind and white-wash," he exclaimed.

Clem, who was on civilian duty, had stopped by for a drink, had a long look at his son from the doorway. "Hello, Dad!" he cried. "Vin!" exclaimed his father, whirling. "Where did you spring from?" "Bellman," he replied, answered the boy. "We have transferred," he added, boyishly chivalrous in his natty pilot officer's uniform.

"Bellman!" cried Clem. "Why, you're on the doorstep!"

"Yes, I am a grail," commented Vin. "You don't know the half of it." He pointed proudly to his officer's designation. "See that?" "So soon?" exclaimed his father, elation blushing with a more ominous feeling. "Well, great stuff. Congratulations!"

"Things are moving pretty fast," said Vin. "They cut short the course. I got fifty-five per cent in the test, Dad, and my five weeks' leave on the strength of it."

Despite the fact that Vin had phoned both his mother and Carol about his visit, he was astonished to find them together when he arrived home. "I'm glad to see you again, my mother, then Carol, as if it were the most natural thing in the world, turned simply and kissed him.

"See these?" exulted Vin, when he had recovered from his kiss, pointing to his insignia. "I'm in the Royal Canadian Air Force now!"

"Now you're ready for real flying," said, "but real —" He stopped short, realizing he might be blundering.

"Fighting," said Tobey, ending the sentence. In his mind's eye was her son, of yesterday. And now he was still full of ten-ago, going out to join the armored knights of the sky.

At dinner, Clem disbursed the news that Gladys, the maid, was to leave the household and return to England to join the Women's Auxiliary Air Force. Then, with total unexpectedness, Tobey turned to his father and said: "Is Vin going to marry Carol?" Vin, who had a mouthful of delicious helping of food in his mouth, Mrs. Miniver quickly tried to change the subject. Tobey repeated his query, this time directly to Vin, flushing.

HOW TO PREVENT MANY COLDS

From Developing

Quick — Put a few drops of Vicks Va-Tro-nol up your nose at the first sniffle, sneeze, or sign of catching cold and let its stimulating action aid Nature's defense against the cold.

"Well, Tobey," said Vin, flushing.

The Old Books

No More Reprints In Britain Due To Paper Shortage

"You cannot buy 'Jane Eyre' in London today," we learn from James Agate's column in the London Express. "You cannot buy a set of Dickens. If you don't have Shakespeare at home, it's too late now. The bookshops could sell the English classics by the hundreds—if they had them."

Apparently England is continuing to produce new books—one of them is reviewed in the article quoted. But "Jane Eyre" and "David Copperfield" and "Hamlet" are reprinted for a long, slow sale, and cannot be afforded when there is a paper shortage.

It is one of the effects of war that probably was as little foreseen as the rubber shortage, and its results can be as little predicted. The Bible is reputed to be the perennial best seller, and yet if no more Bibles were printed, for a hundred years, there would still be Bibles. But how many? How much does our culture depend upon old books? That we could not know unless, when printing was stopped, all existing copies were destroyed.

Such a thing, we are told, has happened in Germany. Maybe that is the answer. But meanwhile it might be a good idea to re-read "Plewick Papers" or "King Lear." There is much sanity left in them in a world hungering for sanity.—Chicago Daily News.

EACH KEEP HALF

Korea is the only country in the world where the marriage certificate is divided, one-half being given to the bride and the other half to the groom.

A Secret Preparation

British Doctors Testing Liquid Which Nazis Give Their Troops

A phial of colorless liquid, familiar to Rommel's Afrika Corps, has been unearthed by British authorities. It is a preparation which the Germans give their troops to increase endurance. A German doctor who left Germany in 1933 and went to London claims that the Nazis have been testing the effectiveness of this concentrated, energy-giving preparation for some years and he believes that Rommel's men are receiving it—probably in tablet form. Doctors in Britain are testing the efficiency of the preparation, which is not a drug. Apparently it has been known for some time that the Germans administered drugs to their troops, just before going into battle, but now the Nazi medical organizations are discouraging the use of drugs. They claim that the ultimate effect of these "pep" drugs is harmful—that in the end resistance to fatigue and exhaustion is lowered.—Toronto Telegram.

Apparently England is continuing to produce new books—one of them is reviewed in the article quoted. But "Jane Eyre" and "David Copperfield" and "Hamlet" are reprinted for a long, slow sale, and cannot be afforded when there is a paper shortage.

It is one of the effects of war that probably was as little foreseen as the rubber shortage, and its results can be as little predicted. The Bible is reputed to be the perennial best seller, and yet if no more Bibles were printed, for a hundred years, there would still be Bibles. But how many? How much does our culture depend upon old books? That we could not know unless, when printing was stopped, all existing copies were destroyed.

The Bible is reputed to be the perennial best seller, and yet if no more Bibles were printed, for a hundred years, there would still be Bibles. But how many? How much does our culture depend upon old books? That we could not know unless, when printing was stopped, all existing copies were destroyed.

It is one of the effects of war that probably was as little foreseen as the rubber shortage, and its results can be as little predicted. The Bible is reputed to be the perennial best seller, and yet if no more Bibles were printed, for a hundred years, there would still be Bibles. But how many? FLAX RUST
There are over 130 distinct species of rust fungi, but only 10 are of economic importance. Rust spores are common not only on our cereal crops, but on hollyhocks, astilbes, roses, goldenrod, spruces, firs, willows, poplars, sandrings, with grasses, cereals, and a wide variety of other plants.

All rust fungi are obligate parasites. That is to say, they can only live and reproduce on living host plants, such as the one named, stem rust of wheat, two different host plants to complete their life cycle. The stem rust, *Uromyces*, on wheat, and black rust, *Uromyces*, on wheat and other grasses. The red spores multiply and produce new infections, while the black spores fly through the air to germinate.

Black rust is different. When it has spores produced in the fall, the spores germinate in the soil, and the spores they produce can infect flax directly. Herin lie an important mould. Rust, wheat straw lying about the field in fall, straw lying about the field in winter, straw and stubble are likely to produce a crop of spores which will infect nearby flax fields. So, sure as eggs are laid, you can't be sure in the fall if it will not burn. Next year sow flax as far away as possible from where flax grew this year.

Chinook United Church

Rev. R. W. French, B. A
(11:45 a. m — Sermon Subject:
"Keep Faith in Mankind")

During these days when the very foundations of our faith in mankind are being shaken is it possible for us to maintain a hopeful attitude towards mankind? Everything depends upon our estimate of human nature.

We wish to remind the boys and girls of the Children's Story.

Get out of the Daily Grind. Come to Church on Sunday.

R. W. French

Word has been received by Mrs. R. Morrison of the sad death of her brother-in-law in South Africa, his wife had been expecting him home on leave when the word came from the admiralty of his death.

The farmers in this district have not been able to do any harvesting this week owing to the wet weather.

PATRONAGE DIVIDENDS

LOWER ELEVATOR HANDLING CHARGES

LOWER GRAIN CHARGES

The above have all been put into effect in the grain handling business this year.

Does any farmer believe all this would have happened if there were no Pool Elevators?

If at all possible deliver your grain to

Alberta Pool
ELEVATORS

ELEVATORS UNABLE TO HANDLE TOUGH OR DAMP GRAIN

The Honorable D. Bruce McMillan, Minister of Agriculture for Alberta, has issued the following statement with regard to the harvesting and threshing of the Alberta grain crop.

"Alberta's wheat and coarse grain crop this year has possibilities of producing highest yields in the history of the province. Unfortunately adverse harvest weather with wind and rain, has prevailed with the result that crops in most sections are two weeks late in ripening with considerable lodging in many fields.

"Elevator agents will be compelled to refuse storage for tough grain. Risks are too great. Heating may take place in bin which may not only spoil the grain but which may also cause fire in the elevator. Grain mites also thrive when the moisture content of the crop is high. Farm storage of tough grain is subject to the same risks.

"Farmers throughout the province should avoid threshing or combining until grain is dry. The crop is safer stored in the field than stored in a tough condition in a bin."

"The Provincial Department of Agriculture asks for the co-operation of all farmers in connection with the above matter."

These Combination Offers are the Biggest Bargains of the year and are fully guaranteed. If you already subscribe to any of the magazines listed, your subscription will be extended. Send us the Coupon TODAY.
